when choosing a new catalytic converter for your vehicle, there are a number of things to consider. these include but are not limited to: size, size, cost, durability, lifetime, and installation. in order for your car to run cleaner and efficiently, you need to buy the right converter. if you are going to look for a converters according to the manufacturer's specification, be careful. the wording of the description might contain a typo. now you are ready to buy a catalytic converter for your vehicle. we would advise that you read the instructions that come with the converter before installing it. you might need to contact a local service technician or the installer for assistance to avoid possible problems. the first step in installing a new catalytic converter is disconnecting the battery of the vehicle and shutting down the car engine. then you need to remove the catalytic

---

converter from the exhaust pipe. once you have removed the converter, you need to put the new one back in place and connect the car battery. the replacement of a catalytic converter is something that you must do once a year. even though the mechanical part of a catalytic converter lasts about 3 to 5 years, it is a good idea to replace it every year. this should be done with caution and ideally should be done by a professional. one thing you should always do with a catalytic converter is to remove it after a few years. don't be too quick to install a new converter and forget to remove the old one. after a few years, it might break if improperly installed. in this case, your mechanic or installer will need to fix it for you.
